IN SHORT

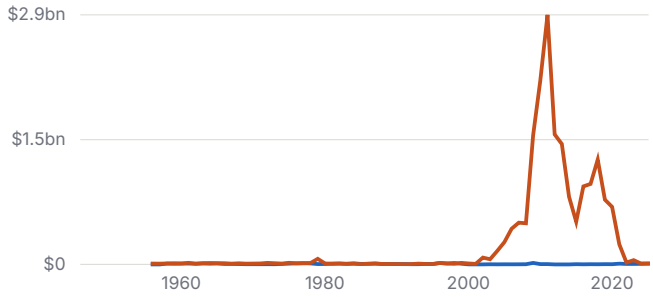

- UCDP records the United States fighting the Taliban, then in power in Kabul (2001). That authority does not hold the UN seat of Afghanistan, and the UN is this site's reference. Who the relationship is with, and which rules apply, is therefore unclear, so the site computes no index for this pair.
- At the UN their vote agreement is 54% (2022–2024), lower than either of them has with most countries.
- Trade in goods ($31 million a year) is a very small part of either country's trade, under 0.5%.
- In its UN General Debate speeches, Afghanistan names the United States more often than the reverse (194 sentences against 111).
- 199,000 people born in Afghanistan live in the United States (UN DESA counts place of birth, however long ago they moved).
