IN SHORT

- Armed conflict: UCDP records them on opposite sides of the conflict in Azerbaijan, with Armenia supporting another party, most recently in 2023.
- At the UN their vote agreement is 87% (2022–2024), higher than either of them has with most countries.
- Only part of their trade in goods is on record ($263 thousand a year): the IMF data have no exports from Armenia to Azerbaijan in these years, which may mean there were none or that they were not reported.
- In its UN General Debate speeches, Azerbaijan names Armenia more often than the reverse (581 sentences against 338).
- 187,000 people born in Azerbaijan live in Armenia (UN DESA counts place of birth, however long ago they moved). A separate count, by UNHCR: 115,000 refugees and asylum seekers from Azerbaijan in Armenia; the two counts measure different things and are not added up.

HOW SURE WE ARE

UN votes	**High**	197 shared votes on whole texts in 2022–2024, the years the headline share covers. With that many, a share is good to about ±7 points.
Trade	**Low**	Goods trade is reported in 1 of the 3 years 2023–2025. Goods only, from customs data (IMF); services and energy pipelines are not in it.
Security	**High**	The Uppsala Conflict Data Program covers every state up to 2025. It counts only conflicts with at least 25 battle deaths a year.
Shared clubs	**High**	The list of tracked groups is fixed; membership is checked by hand.
Index	**Low**	As sure as the weaker of its two required parts, votes and trade. Security and shared clubs add to it but never make it surer.
