IN SHORT

- Armed conflict: UCDP records them on opposite sides of the war in DR Congo, each supporting a side, most recently in 2023.
- At the UN their vote agreement is 94% (2022–2024), higher than either of them has with most countries.
- Only part of their trade in goods is on record ($28 thousand a year): the IMF data have no exports from Bangladesh to Rwanda in these years, which may mean there were none or that they were not reported.

HOW SURE WE ARE

UN votes	**High**	222 shared votes on whole texts in 2022–2024, the years the headline share covers. With that many, a share is good to about ±7 points.
Trade	**High**	Goods trade is reported in 3 of the 3 years 2023–2025. Goods only, from customs data (IMF); services and energy pipelines are not in it.
Security	**High**	The Uppsala Conflict Data Program covers every state up to 2025. It counts only conflicts with at least 25 battle deaths a year.
Shared clubs	**High**	The list of tracked groups is fixed; membership is checked by hand.
Index	**High**	As sure as the weaker of its two required parts, votes and trade. Security and shared clubs add to it but never make it surer.
