IN SHORT

- Armed conflict: UCDP records them on opposite sides, as main parties, in 1969. (Russia was then part of the Soviet Union.)
- At the UN their vote agreement is 80% (2022–2024), among the highest either of them has with any country.
- Trade in goods ($221 billion a year) is very important for Russia, much less so for China.
- In its UN General Debate speeches, China names Russia more often than the reverse (490 sentences against 255).
- 21,000 people born in Russia live in China (UN DESA counts place of birth, however long ago they moved).

HOW SURE WE ARE

UN votes	**High**	269 shared votes on whole texts in 2022–2024, the years the headline share covers. With that many, a share is good to about ±6 points.
Trade	**High**	Goods trade is reported in 3 of the 3 years 2023–2025. Goods only, from customs data (IMF); services and energy pipelines are not in it.
Security	**High**	The Uppsala Conflict Data Program covers every state up to 2025. It counts only conflicts with at least 25 battle deaths a year.
Shared clubs	**High**	The list of tracked groups is fixed; membership is checked by hand.
Index	**High**	As sure as the weaker of its two required parts, votes and trade. Security and shared clubs add to it but never make it surer.
