Relationship index, −100 to +100. Votes and security run from −100 to +100; trade and shared clubs from 0 to 100.

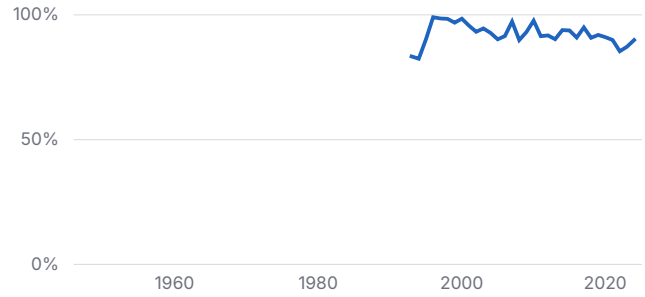

IN SHORT

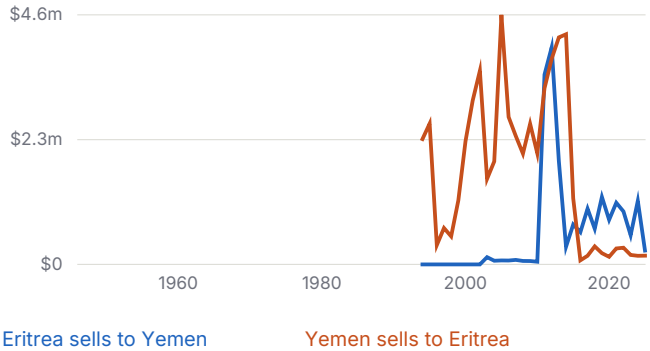

- UCDP records Eritrea supporting a side against the Ansarallah (Houthi) authorities in Sanaa (2015–2018). That authority does not hold the UN seat of Yemen, and the UN is this site's reference. Who the relationship is with, and which rules apply, is therefore unclear, so the site computes no index for this pair.
- At the UN their vote agreement is 88% (2022–2024), about average for both of them.
- Trade in goods ($823 thousand a year) is a very small part of either country's trade, under 0.5%.
- At the UN they name each other about equally often (6 and 9 sentences).
- 2,000 people born in Eritrea live in Yemen (UN DESA counts place of birth, however long ago they moved). A separate count, by UNHCR: 988 refugees and asylum seekers from Eritrea in Yemen; the two counts measure different things and are not added up.

Bar: since 2010. Mark: all years. Share of roll-call votes on whole texts cast the same way, counted vote by vote; an abstention against a yes counts as a difference. Disarmament, colonialism and economic development count votes up to 2018.

HOW SURE WE ARE

UN votes	**High**	265 shared votes on whole texts in 2022–2024, the years the headline share covers. With that many, a share is good to about ±6 points.
Trade	**High**	Goods trade is reported in 3 of the 3 years 2023–2025. Goods only, from customs data (IMF); services and energy pipelines are not in it.
Security	**None**	Not computable: relations between the two, and the rules that apply to them, are unclear, because the government that holds a UN seat and the authority that rules there are not the same.
Shared clubs	**High**	The list of tracked groups is fixed; membership is checked by hand.
Index	**None**	Not computable: relations between the two, and the rules that apply to them, are unclear, because the government that holds a UN seat and the authority that rules there are not the same.
