Sudan & South Sudan

−5

Distant

Relationship index, −100 to +100. Votes and security run from −100 to +100; trade and shared clubs from 0 to 100.

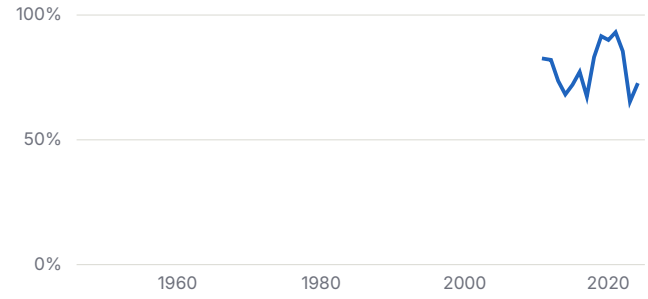

IN SHORT

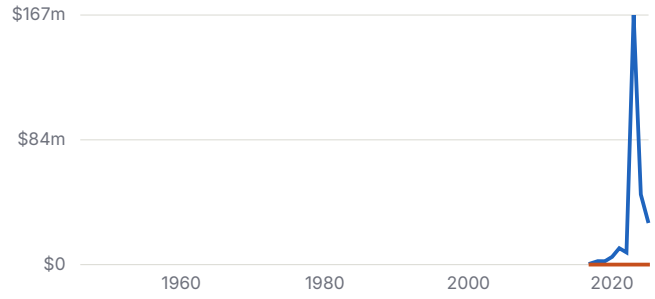

- Armed conflict: UCDP records them on opposite sides, as main parties, in 2012.
- At the UN their vote agreement is 74% (2022–2024), lower than either of them has with most countries.
- Only part of their trade in goods is on record ($81 million a year): the IMF data have no exports from South Sudan to Sudan in these years, which may mean there were none or that they were not reported.
- At the UN they name each other about equally often (69 and 92 sentences).
- 1.5 million people born in South Sudan live in Sudan (UN DESA counts place of birth, however long ago they moved). A separate count, by UNHCR: 635,000 refugees and asylum seekers from South Sudan in Sudan; the two counts measure different things and are not added up.

People	Their national football teams have met 4 times.

HOW SURE WE ARE

UN votes	**Medium**	120 shared votes on whole texts in 2022–2024, the years the headline share covers. With that many, a share is good to about ±9 points.
Trade	**High**	Goods trade is reported in 3 of the 3 years 2023–2025. Goods only, from customs data (IMF); services and energy pipelines are not in it.
Security	**High**	The Uppsala Conflict Data Program covers every state up to 2025. It counts only conflicts with at least 25 battle deaths a year.
Shared clubs	**High**	The list of tracked groups is fixed; membership is checked by hand.
Index	**Medium**	As sure as the weaker of its two required parts, votes and trade. Security and shared clubs add to it but never make it surer.
