Distant

Relationship index, −100 to +100. Votes and security run from −100 to +100; trade and shared clubs from 0 to 100.

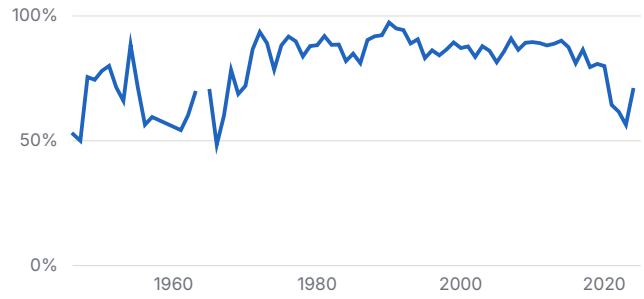

IN SHORT

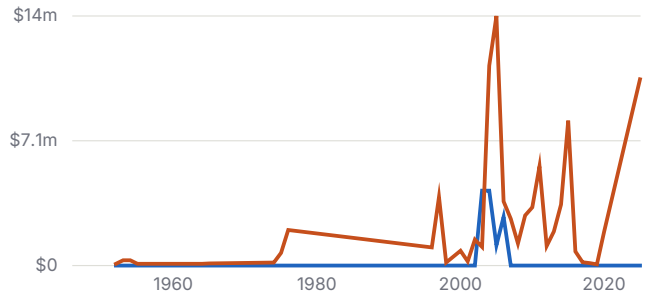

- At the UN their vote agreement is 63% (2022–2024), lower than either of them has with most countries.
- Only part of their trade in goods is on record ($3.5 million a year): the IMF data have no exports from Syria to Ecuador in these years, which may mean there were none or that they were not reported.
- In its UN General Debate speeches, Ecuador names Syria far more often than the reverse (11 sentences against 1).
- 283 people born in Syria live in Ecuador (UN DESA counts place of birth, however long ago they moved). A separate count, by UNHCR: 172 refugees and asylum seekers from Syria in Ecuador; the two counts measure different things and are not added up.

HOW SURE WE ARE

UN votes	**High**	241 shared votes on whole texts in 2022–2024, the years the headline share covers. With that many, a share is good to about ±6 points.
Trade	**Low**	Goods trade is reported in 1 of the 3 years 2023–2025. Goods only, from customs data (IMF); services and energy pipelines are not in it.
Security	**High**	The Uppsala Conflict Data Program covers every state up to 2025. It counts only conflicts with at least 25 battle deaths a year.
Shared clubs	**High**	The list of tracked groups is fixed; membership is checked by hand.
Index	**Low**	As sure as the weaker of its two required parts, votes and trade. Security and shared clubs add to it but never make it surer.
