IN SHORT

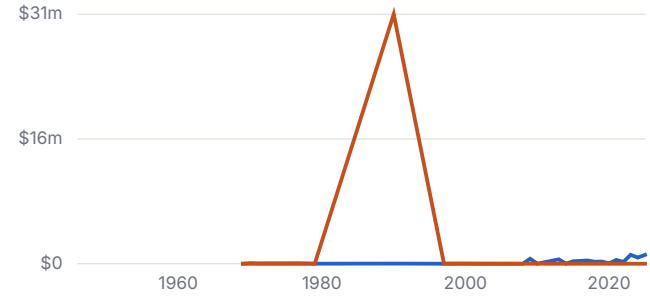

- Armed conflict: UCDP records them on opposite sides of the war in Uganda, each supporting a side, in 1979.
- At the UN their vote agreement is 93% (2022–2024), higher than either of them has with most countries.
- Only part of their trade in goods is on record ($993 thousand a year): the IMF data have no exports from Libya to Tanzania in these years, which may mean there were none or that they were not reported.
- 297 people born in Tanzania live in Libya (UN DESA counts place of birth, however long ago they moved).

HOW SURE WE ARE

UN votes	**High**	224 shared votes on whole texts in 2022–2024, the years the headline share covers. With that many, a share is good to about ±7 points.
Trade	**High**	Goods trade is reported in 3 of the 3 years 2023–2025. Goods only, from customs data (IMF); services and energy pipelines are not in it.
Security	**High**	The Uppsala Conflict Data Program covers every state up to 2025. It counts only conflicts with at least 25 battle deaths a year.
Shared clubs	**High**	The list of tracked groups is fixed; membership is checked by hand.
Index	**High**	As sure as the weaker of its two required parts, votes and trade. Security and shared clubs add to it but never make it surer.
