IN SHORT

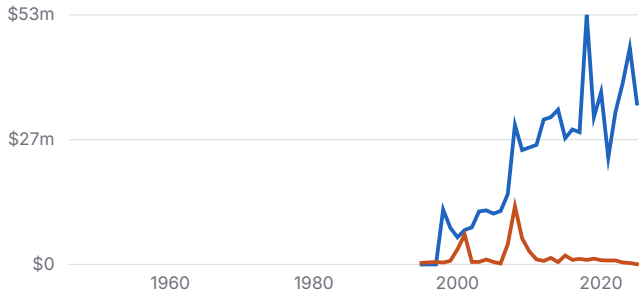

- Armed conflict: UCDP records them on opposite sides of the war in DR Congo, each supporting a side, most recently in 2025.
- At the UN their vote agreement is 90% (2022–2024), higher than either of them has with most countries.
- Trade in goods ($40 million a year) is modest for Rwanda, much less so for South Africa.
- In its UN General Debate speeches, Rwanda names South Africa far more often than the reverse (145 sentences against 7).
- 3,200 people born in Rwanda live in South Africa (UN DESA counts place of birth, however long ago they moved). A separate count, by UNHCR: 1,500 refugees and asylum seekers from Rwanda in South Africa; the two counts measure different things and are not added up.

HOW SURE WE ARE

UN votes	**High**	224 shared votes on whole texts in 2022–2024, the years the headline share covers. With that many, a share is good to about ±7 points.
Trade	**High**	Goods trade is reported in 3 of the 3 years 2023–2025. Goods only, from customs data (IMF); services and energy pipelines are not in it.
Security	**High**	The Uppsala Conflict Data Program covers every state up to 2025. It counts only conflicts with at least 25 battle deaths a year.
Shared clubs	**High**	The list of tracked groups is fixed; membership is checked by hand.
Index	**High**	As sure as the weaker of its two required parts, votes and trade. Security and shared clubs add to it but never make it surer.
